

A SPEAKER FOR YOUR GROUP

I can speak or conduct a workshop on these topics for your group. The programs are based on my books, games, and many years of experience.

You Can Be More Creative. This book and program features over three dozen creativity techniques to help you become more creative in your work and personal life. These are techniques I've worked with for over three decades to write books, scripts, and songs; create businesses; design games; and more. The techniques include hypnosis; dreaming; meditation, mindfulness, and automatic writing; journeying; visualization; brainstorming; mind mapping; and many other sources of insights and ideas.

Writing and Publishing Your Book. This program is based on my experience in writing and publishing over 250 books; writing and executive producing 18 feature films, documentaries, and TV film series; and writing three dozen scripts and receiving 264 awards in international film festivals. I also have a company that helps book and screenplay writers find publishers, agents, and producers. This talk and workshop will provide you with guidelines on how to write your book and get it published or write a script and get it produced. I can talk about how to turn your book or script into a film, too.

Using AI for Writing and Illustrations. This program features the many different ways I have used AI to write books, articles, blogs, flyers, and more; create videos and PowerPoints; design marketing and promotional materials; and more. It shows how you can use AI and uses videos to illustrate these different ways to use AI. It also discusses the different AI programs for writing and creating images.

Play Life as a Game. Based on the book of the same name, this program invites you to see your choices, challenges, and everyday experiences as a game you might design, play, and win. It combines insights from psychology, creativity research, and game design with exercises using your imagination and role-play to create the goals, objectives, rules to play, and gain the knowledge, tools, and motivation to improve your everyday life by gaining more purpose and confidence, overcome fears and difficulties, and achieve more success in whatever you do.

Discovering the Game Experience and Creating Your Own Games. This program features the games experience, based on participating in three or four communication and party games tailored to your group, featuring games such as: *Brainstorm*, *Imagine It*, *Create It*, *If You Could Be or Do Anything*, *Turnabout*, and more, combined with a discussion and workshop about designing games. The discussion focuses on how I have designed different types of games for over 40 years, followed by a workshop on how to create your own games to play with others.
